TCO '07 certification for headsets

Plantronics is the first manufacturer to adopt the new TCO '07 headset standard across its range of headsets worldwide starting with key models from each of its business segments. The certification means that the headset is designed and manufactured according to some of the strictest performance and environmental criteria in the world. Headsets certified meet TCO Development's requirements on ergonomics, ecology and energy and cordless headsets also meet the requirements on emissions. Visit www.tcodevelopment.com for more details.

Universal compatibility

Universal Compatibility

Plantronics Bluetooth headsets are designed to work with Bluetooth enabled phones and other devices that meet a minimum Bluetooth 1.1 specification and support Bluetooth Headset and Hands-Free profiles.

How our technology improves your user experience

AcuSpeak

This microphone selects only the human voice, cutting other sounds out of your transmission.

Audio Line Out

Stream music from your Bluetooth stereo phone to your powered speakers for public listening.

Multipoint

Allows you to use one headset to switch between two different Bluetooth audio devices.

Noise-cancelling microphones

Reduce the background noise and so enhance the accuracy of the sounds being transmitted – ideal for noisy environments.

Sidetone

Gives natural feedback so that what you hear is exactly the same as what the person you are calling hears.

WindSmart

Uses a specially designed material over the microphone to diffuse wind noise.

AudioIQ® Exclusive to Plantronics

Featured in Discovery 665 and Voyager 815/855

AudioIQ: the smartest way to hear and to be heard

AudioIQ is a new Digital Signal Processing (DSP) technology, reducing background noise by up to 8dB, so that the person you are talking to can hear you more clearly.

The best way to explain it

If you listen to music in your car, you'll know that you have to constantly adjust the volume, because the background noise depends on how fast you are driving. AudioIQ makes the adjustment automatically therefore ideal for a mobile professional on an important call.

If the noise around you is louder, you need a bit more volume when you are listening. But you also need the background noise eliminated when you are talking – and Plantronics headsets featuring AudioIQ do this 100% more efficiently than our competitors.

Sound Innovation™ for missions to the moon. And for everyday life on this planet, too.

In 1969, a Plantronics headset carried the historic first words from the moon: "That's one small step for man..." From the man on the moon to the man on the street, Plantronics is an innovation leader dedicated to creating communication solutions for people who understand and appreciate the real freedom of space. From outer space to inner space, find your space.
