Headset range

Why use a headset?

Whether talking business on the telephone, interacting with a PC or chatting to friends via the internet, Plantronics headset solutions combine advanced technology and practical design to enable people to communicate more freely – whatever they are doing and wherever they are.

- **A better way to work:** Our headsets enable workers to be hands-free, to multi-task in comfort and our wireless headsets provide you with the extra advantage of being able to move around the office whilst continuing the call.
- **Specialist support:** for contact centres, comfortable and durable headsets with the best sound, protection and technology are paramount for call clarity and ergonomic health and safety.
- **Hands free on the move:** need to make a call whilst out and about? Using a Bluetooth headset means this can be done easily and in comfort, ensuring you are connected at all times.
- **Make the most of multi-media:** whether listening to favourite tunes, or chatting over the internet, headsets provide better sound clarity – hear and be heard clearly.
- **Virtual surround sound:** maximise the enjoyment of PC gaming with quality headsets that provide noise-cancelling and surround bass sound enabling ultimate player involvement and performance.

Why Plantronics?

Plantronics invented the first lightweight headset more than 40 years ago, and almost immediately touched off a revolution in personal communications.

From the beginning, when we were first specified for NASA's historic moon mission, we have defined what headset quality, comfort and reliability mean – setting the standards against which all others are measured. Today, we still make the most advanced headsets, using strong, flexible, but lightweight materials, along with the very latest refinements in acoustics, ergonomics and technology. Our innovative designs give you the freedom of hands-free convenience, and a crystal-clear conversation in any environment.

Personal communications are a vital part of all our lives. So whether you're at work, on the move, or at home, you can trust us for your most important communications.

Find your space with the right headset

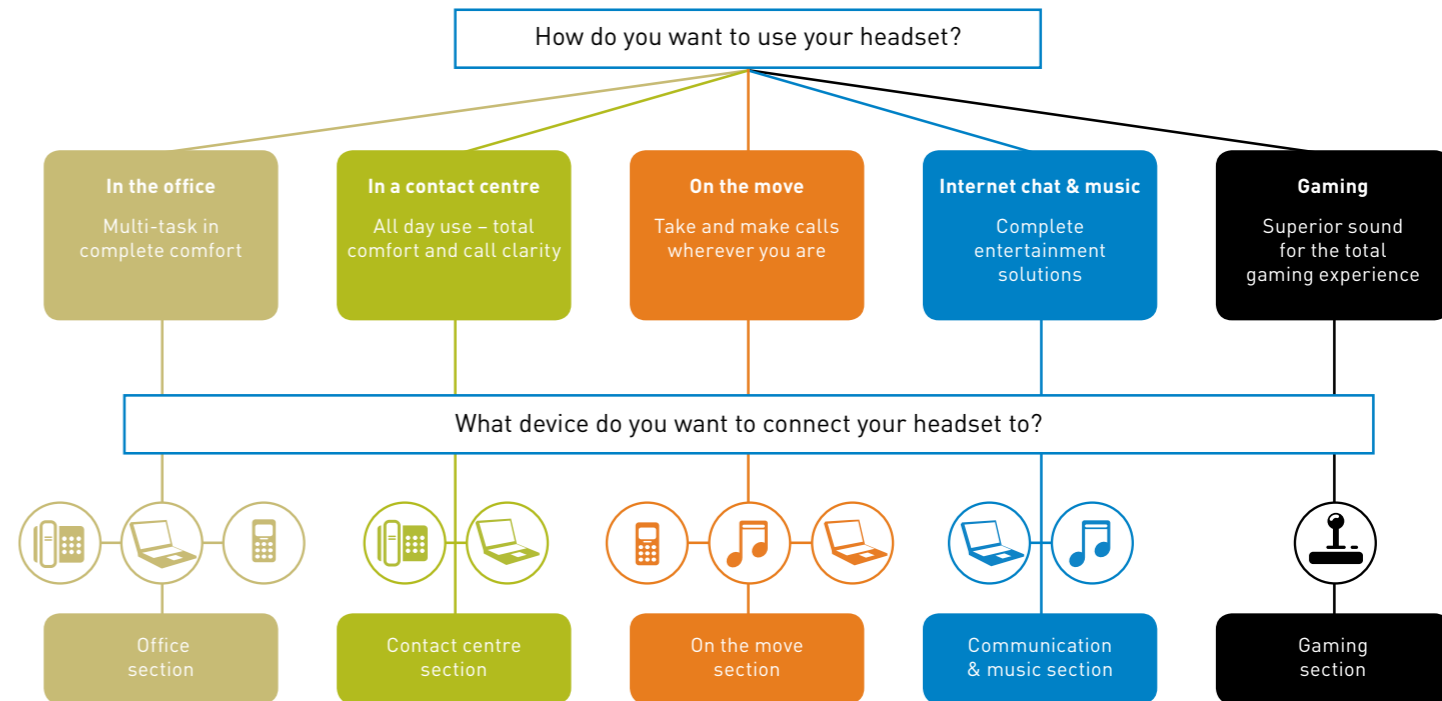

People communicate in increasingly diverse ways. So there are subtle as well as obvious differences in our headsets; allowing individuals and organisations the freedom and choice to work, talk, listen and play exactly as they want.

Plantronics has an extensive portfolio of headsets to fit every need. This page is designed to help find the right headset.

Use the flowchart opposite to:

- Identify how and where the headset is to be used
- Choose what device the headset is to connect to – mobile, desk phone, PC or laptop
- Use the icons as a reference and then turn to the appropriate section

Compatibility key:

A better way to work

With Plantronics office headsets that connect to your desk phone, laptop and mobile you can find a better more comfortable way to work.

Using a headset for conversations means you are no longer restricted by a handset – enabling you to multi-task more easily. Continue typing whilst talking and be free to reach for a document without interrupting your call.

With our wireless models you experience even more freedom. With up to 100 metre range and noise-cancelling technology you can stay connected as you move around the office to confer with colleagues or to find some privacy for that important call.

Find your working space with Plantronics office headsets.

Best in class

Plantronics has been developing contact centre headset solutions for more than 40 years. We understand that workers who use the phone as their main work tool need to hear and be heard clearly to ensure maximum productivity and customer satisfaction. Our solutions are designed for comfort and built to last.

You can choose your headset from amongst the widest portfolio in the business. Changeable hygienic voice tubes or noise-cancelling microphones, the latest sound protection technology of our audio processing units or the ultimate wireless systems to enable team supervision and flexible assistance on the move – all backed by our industry leading warranty and customer support.

Hands free on the move

Today we work and live in increasingly different ways and use various devices to stay in touch whilst on the move. Whether you are in the car, at the airport or out and about – Plantronics range of stylish Bluetooth headsets offer you solutions to communicate with all your mobile devices – mobile phone, PC or PDA – and enable you to do this hands free!

For optimum call clarity our headsets include noise-cancelling technology that decreases background noise – so wherever you take your calls, our headsets will ensure you can hear and be heard more clearly.

Keep on the move with Plantronics.

Sound Innovation™ for missions to the moon. And for everyday life on this planet, too.

In 1969, a Plantronics headset carried the historic first words from the moon: "That's one small step for man..." From the man on the moon to the man on the street, Plantronics is an innovation leader dedicated to creating communication solutions for people who understand and appreciate the real freedom of space. From outer space to inner space, find your space.
