

# Plantronics SupraPlus® Wideband USB

## for Microsoft Office Communicator

With the SupraPlus Wideband USB for Office Communicator, you will benefit from clearer conversations enabled by wideband audio and enjoy improved privacy when listening to voicemail or participating in conference calls.

Also, the ability to combine a phone call with a Unified Communications application such as Instant Messaging or e-mail, allows you to find a better, more comfortable way to work.

### Key features:

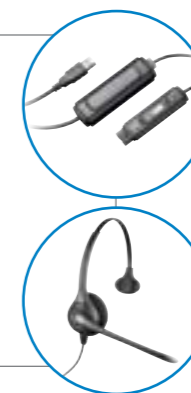

- **Wideband audio** – clearer and more intelligible conversations so you can communicate more effectively
- **Call control** – integration with Microsoft Office Communicator allows you to easily answer or end calls at the touch of a button

- **Reliability** – SupraPlus is trusted by both office and contact centre professionals as the premium headset for reliability and durability
- **Optimised** – for Microsoft Office Communicator 2007

### Call control

- This headset integrates with Microsoft Office Communicator, allowing call answer/end using an easy to find button on the inline controls. This adds convenience and is particularly useful if the PC's screen saver has locked – allowing you to answer or end a call with a simple button press rather than needing to first enter a password to unlock the PC.
