

# PLANTRONICS RAISES THE STANDARD AGAIN. ENCORE. THE NEXT GENERATION HEADSET.

- **Sound Quality from the Leaders.** Encore is the first lightweight communication headset with the SES™ Sound Enhancement System tone control switch. You also get the benefits of Sound Guard®-Plus™ and Call Clarity technologies: speech that is comfortable to listen to and easy to understand, plus voice-transmission quality that exceeds that of many handsets.
- **Comfortable and convenient.** We conducted the largest human-factors study of the ear ever undertaken to design this super-stable, super-light headset. With multiple adjustments possible, the Encore headset will fit just about anyone comfortably. The headband and turret are click-stop positionable to maintain the right fit. -Binaural models are designed without a cable yoke. And all models are OSHA-safe.
- **New Durability.** The Encore headset is the most rugged we've ever designed. Even the new lighter weight cables are strong. New flexible circuit technology and rigid ISO-9001 quality testing result in a headset that can take day-in, day-out use.

The world's leader in communication headsets does it again: the Encore headset. Slip on the best sounding, most comfortable headband headset yet. The Encore product embraces

a new generation of headset technologies: human-factors engineering for near-universal fit, tone controls for sound enhancement, and featherweight design for all-day comfort.

## ENCORE HEADSET

*From the world's premier provider of lightweight communication headsets—Plantronics does it again.*

# H91: ENCORE™ MONAURAL HEADSET

Single ear cushion model delivers superior sound quality, durability, and comfort for all-day use.
